- “..the only persons who may be credited as co-authors are those who themselves made a considerable contribution to the design of the studies or experiments, to working out, analysing or interpreting the data and to drawing up the manuscript..”

“[All authors must have] agreed to [the manuscript’s] publication.”

- “Management of the organisation unit in which the publication arose is not, in itself, sufficient grounds to claim authorship..”

“The authors always bear joint responsibility for the content.”
