

Authorship

'An author is an individual who has made a genuine, identifiable contribution to the content of a research publication...

All authors agree on the final version of the work to be published.

but not explicitly stated otherwise, they share responsibility for the publication.

Explanations:

The contribution must add to the research content of the publication. What constitutes a genuine and identifiable contribution must be evaluated on a case-by-case basis and depends on the subject area in question. An identifiable, genuine contribution is deemed to exist particularly in instances in which a researcher – in a research-relevant way – takes part in:

the development and conceptual design of the research project, or

the gathering, collection, acquisition, provision of data, software, or

the analysis/evaluation, interpretation of data, suraes and conclusions drawn from them, or

• the drafting of the manuscript.

And leadership supervisory function does not constitute self-ownership.

The image features a blue-tinted background with a blurred architectural structure. Overlaid on this is the DFG logo, which includes the word 'DFG' in large, bold, white letters and the word 'Forschung' in a smaller, white, sans-serif font above it. The text 'Guidelines for Safeguarding Good Research Practice' is written in a bold, black, sans-serif font.

Guidelines for Safeguarding Good Research Practice

Code of Conduct

A horizontal bar at the bottom of the page, composed of several rectangular segments in various shades of blue, ranging from light to dark.

Guidelines for Safeguarding Good Research Practice

Code of Conduct

"An author is an individual who has made a genuine, identifiable contribution to the content of a research publication...

All authors agree on the final version of the work to be published.

Unless explicitly stated otherwise, they share responsibility for the publication.

Explanations:

The contribution must add to the research content of the publication. What constitutes a genuine and identifiable contribution must be evaluated on a case-by-case basis and depends on the subject area in question. An identifiable, genuine contribution is deemed to exist particularly in instances in which a researcher – in a research-relevant way – takes part in:

- the development and conceptual design of the research project, or
- the gathering, collection, acquisition or provision of data, software or sources, or
- the analysis/evaluation or interpretation of data, sources and conclusions drawn from them, or
- the drafting of the manuscript.

A leadership or supervisory function does not itself constitute co-authorship."
